GOOD BUSINESS

During the Week in Shoes and Small Industries.

The Smallest Sale of Wool in Any Week for Several Years.

A Sharp Decline in the Prices of Cotton Goods—Iron Industry Shows a Slight Decline—The Wheat Market is Weak—Number of Failures Decreased.

New York, March 21.—R. G. Dun & Co. says Saturday:

Failures for two weeks of March cover liabilities of \$6,799,987 against \$7,872,471 last year. Failures for the week were 261 in the United States against 278 last year and 49 in Canada against 35 last year.

Movement toward better things is still the exception. There is better business in shoes and small industries, and there has been a squeezing of short sellers in cotton, but the general tendency of industries and prices is not encouraging, and those who were most hopeful a month ago are still waiting, not so hopefully, for the expected recovery.

Obstructions to recovery are not to be sought primarily in the investment or the money market, but in the industrial reaction after the unnatural expansion of demand and prices last year. It is a striking fact that the only great industry which is now rapidly gaining in business is the one in which prices have been generally cut down to last year's lowest figures, and the boot and shoe makers had a reason for hesitation in the prices of leather, which still average six per cent. higher than a year ago, though hides are 13 per cent. lower, having again declined the past week about three per cent.

If the manufacturers get narrow profits or none, they are least doing a business which will keep most of the works in operation. The woolen mills have different conditions, and with prices already below last year's lowest average, and wool 5.3 per cent. higher than it was then, they are not getting business to keep works in operation.

Sales of wool were the smallest in any week for years.

A sharp decline in the prices of cotton goods is the comment of mills on rising cotton. Goods now average lower than since May, 1895, having declined 4.2 per cent. for the week—print cloths to 2½ cents, which is only a sixteenth above the lowest price on record. The accumulation of goods in the face of slack and rapidly diminishing demand has brought the closing of one of the largest mills, and others are considering.

The iron industry shows but a slight average decline in prices as combinations still insist upon the highest prices of last year, and the demand is naturally curtailed. Quotations are deceptive because lower prices are constantly made to secure business. But with ore and coke combinations demanding high figures, hesitation is inevitable. Minor metals change little, but aluminum, by misprint quoted here erroneously last week, sells at 50c.

Speculation in cotton has caught short sellers in trouble and just because they thought prices must go lower, the shorts are forced to put them up. Such a rise may go on without regard to supply or demand, but neither the government report of last week nor the fall in goods and closing of mills, give reason to suspect more than a speculative rise.

The market in wheat has been weak, though rather stagnant, but the weight of facts is felt, as western receipts for three weeks of March have been 8,982,483 bushels, against 6,624,929 last year. Atlantic exports, flour included, show a decrease, amounting to 4,048,004 bushels for three weeks, against 5,907,190 last year.

The movement of corn continues very large and prices have declined one cent for cash.

A troublesome feature of the situation is the stringency in commercial loans, not because of scarcity of money, but because banks are disturbed by failures of some importance.

Another Cuban Joint Resolution.
